The telecom industry is pushing 4G/5G in every town, irresponsibly installing hazardous cell towers near homes and adding cells to telephone poles without any safety testing. Current safety limits haven't been updated since 1996 and the Federal Communications Commission has been [sued for ignoring 11,000 pages](#) of scientific, medical and citizen evidence of harm.

The US National Toxicology Program completed a \$30M study that found cell phone radiation causes [cancer and DNA damage](#). Additional peer reviewed published studies link wireless radiation to our growing rates of **insomnia, headaches, nose bleeds, nausea, pain, cognitive impairment, memory loss, fatigue, behavioral issues, learning disabilities, anxiety, depression, neurotoxicity, digital addiction, infertility** and more.

Cece Doucette, MTPW, has helped to introduce legislation in [New Hampshire](#) and [Massachusetts](#) to educate and protect the public. Additionally, her school district is the [first in the nation](#) to begin safeguarding students and staff from wireless radiation.

Cece will walk us through this issue, answer questions and demonstrate radiation emissions from wireless technology. You'll learn simple solutions you and your loved ones can use TODAY to access technology much more safely.

Hope to see you there!

If this is new to you, consider watching the award-winning film [Generation Zapped](#) in advance (Amazon Prime, library subscriptions to [Kanopy](#) or [Hoopla](#), or [download](#) for a small fee).
