GREAT BARRINGTON & SHEFFIELD RESIDENTS

You Can Help Assure Safety & Delay 5G Installations

1

PROTECT YOUR FAMILY & PET'S HEALTH

Smoking is known to harm humans but we have a choice to smoke or not. Drugs are known to harm humans but we have a choice to take them or not. 5G mmWave frequencies are known to harm humans, but if implemented in our towns we will have no choice — they will be everywhere with no place to hide. **Proof-of-harm documents from qualified professionals have been submitted to the FCC, but to date they have ignored a 2021 court order to revisit their safety guidelines.**

2

WHAT IS BEING DONE & HOW YOU CAN HELP

A 5G Citizen's Petition for general bylaw has been submitted to our towns. This bylaw can assure safety and delay telecom applications for 5G installations until the FCC has complied with the court order and proven that these frequencies are safe for humans, animals, pollinators, and the environment. Instead we can utilize safer, faster, more reliable fiber-optics. **You can help! Save the dates below, attend the March 16th meeting, and vote yes to the 5G bylaw on May 1, 2023.**

3

LEARN MORE ON MARCH 16, 2023, at 6:30 pm

Sheffield and Great Barrington residents, please come to an informational gathering on March 16 at the Bushnell Sage Library at 48 Main Street in Sheffield. Learn more about the 5G warrant coming up for vote at our May town meetings (below), and the health and environmental effects of these frequencies on humans, animals, birds, bees, and trees. Also watch a free video on the dangers of 5G. **Visit www.SafeHelpsYou.org and RSVP safe@bcn.net.**
